HOW DID 'EARTH' GET ITS NAME?

There are thousands of languages that span across the planet we walk on, so what links that with why we call it the Earth?

The name "Earth" comes from the Old English word "ertha," which means **ground or soil**.

"Earth" wasn't recognized by the scientific community until the 17th century and **won out** over Johannes Kepler's suggestion of "Tellus."

From brainstorming to execution, designing an Instagram infographic about Earth's name was a thrilling ride that allowed me to combine my passion for design and love for our planet into one colorful and educational post.

*Design is like magic - transforming blank
canvases into visual masterpieces
that tell a story and evoke emotions.*
